Event Rigging hire

Rigging is the process and equipment for creating structures that allow for hanging or installing for decorative purposes.

SXS take a unique approach to rigging that maintains our core values of Safety, Aesthetics and fulfilling Client Briefs.

We have worked in most major UK College Ball Venues and have erected a wide range of construction.

This includes everything from simple lighting trusses in marquees to self-climbing ground supports to large-scale custom constructions for circus performances.

Whatever you want to hang, and whatever venue it is in, please get in contact to chat about your requirements and options.
